

How to do.....

Traffic lights

We are thinking today about being ready, sometimes we have to stop but need to be ready to carry on, once it is safe to do so.

You will need:

The cardboard middle from a kitchen roll or cling film.

Black paper.

Other coloured paper including scraps of red, yellow and green.

Glue

Scissors

What to do:

1. Wrap the top half of your cardboard roll in black paper and glue it in place.
2. Cut out circles of red, yellow and green. I have used 2 of each so that my traffic light has 2 sides. Glue them onto the black paper in the right order.
3. Cut strips of coloured paper and glue them round the cardboard roll under the black paper so that your traffic light has a stripy pole.
